A CRM APPLICATION FOR THECHAI SHOP&CO

User Story:

As a sales representative at TheChaiShop&Co, I want to efficiently manage customer relationships and streamline sales processes using our CRM application.

I want to easily access and update employer details, as well as distinguish between online and offline customer records using record types, allowing for personalized interactions.

Additionally, I need the application to automate sales calculations, such as order quantity and total bill amount, to ensure accurate and efficient transactions.

Moreover, I require the ability to generate insightful reports and dashboards to summarize and analyze sales data effectively, aiding in decision-making and strategy development.

Lastly, I would like the application to automate email notifications to customers on their birthdays, informing them of special offers tailored to celebrate their special day, enhancing customer engagement and loyalty.

1. INTRODUCTION

1.1 Project Overview :

The project “A CRM Application for TheChaiShop&Co” focuses on developing a Salesforce-based Customer Relationship Management (CRM) system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes,

maintains customer records, generates reports, and improves customer engagement through automated notifications.

The project user story and objectives are defined in the initial section of the document

1.2 Purpose :

The purpose of this project is to:

- Streamline customer relationship management
- Automate billing and order calculations
- Improve data accuracy
- Enable data-driven decision-making
- Enhance customer engagement through email automation

2. IDEATION PHASE

2.1 Problem Statement (Customer Problem Statement Template)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Sales Representative	Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	Stressed and inefficient
PS-2	Store Manager	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	Confused and dissatisfied

PS-3	Customer	Receive personalized offers and updates	I do not get timely notifications	There is no automated communication	Disconnected and undervalued
------	----------	---	-----------------------------------	-------------------------------------	------------------------------

Problem Statements – TheChaiShop&Co CRM Application

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1		Manage customer orders and billing	Calculations are often incorrect	Order quantity and billing are manual	
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Stressed and inefficient
PS-2	 Sales Representative	Monitor sales and customer records	Reports are delayed and incomplete	Data is stored in multiple files	 Confused and dissatisfied
PS-3	 Customer	Receive personalized offers and updates	I do not get timely notifications 	There is no automated communication	 Disconnected and undervalued

2.2 Empathy Map Canvas

Target Users

- Sales Representatives
- Managers
- System Administrators
- Business Analysts

Empathy Analysis

Aspect	Description
Think & Feel	Need accurate customer data and reports

Hear	Feedback from management
See	Multiple registers and spreadsheets
Say & Do	Enter data manually
Pain	Errors, delays, data loss
Gain	Automation, fast reports

Brainstorming

Brainstormed Ideas

- Manual CRM system
- Excel-based management
- Web-based CRM

- Salesforce-based CRM
- Automated email system

Selected Idea:

Salesforce-based CRM Application for TheChaiShop&Co..

REQUIREMENT ANALYSIS PHASE

2.3 Customer Journey Map

Journey Stages:

- Login
- Access CRM Application

- Enter Customer Data
- Generate Orders
- Calculate Bills
- View Reports
- Decision Making

2.4 Solution Requirements

Functional Requirements

FR No	Requirement
FR-1	User Login

FR-2	Object Creation
FR-3	Data Entry
FR-4	Billing Automation
FR-5	Report Generation
FR-6	Email Automation

Non-Functional Requirements NFR-

1: Usability

The system should be easy to use for sales representatives, managers, administrators, and analysts without requiring technical training.

Requirements :

- Simple and intuitive user interface
- Clear navigation menus
- Easy-to-understand forms
- User-friendly dashboards

Example:

A new sales employee should be able to log in, enter customer details, and generate orders within a few minutes without help.

Salesforce Lightning UI provides drag-and-drop features and easy navigation.

NFR-2: Security

The system must protect customer and business data from unauthorized access.

Requirements:

- Role-based access control
- Secure login authentication
- Encrypted data storage
- Data backup and recovery

Examples:

- Profiles and permission sets
- Object-level and field-level security
- Restricted billing access
- Secure login and password policies

NFR-3: Reliability

The CRM system should work correctly at all times and store data accurately without loss.

Requirements:

- Automatic data saving
- Regular system backups
- Error handling mechanisms
- Stable cloud environment

Example :

If a user enters order data and the internet disconnects, the system should save the information and restore it later.

Salesforce cloud ensures automatic backups.

NFR-4: Performance

The system should respond quickly and handle large amounts of data efficiently.

Requirements:

- Fast page loading
- Quick report generation
- Smooth dashboard rendering
- Minimal delay

Example: When a manager generates monthly sales reports for hundreds of customers, the report should load within 2–3 seconds.

Optimized queries and caching improve speed.

NFR-5: Availability

The system should be accessible whenever required.

Requirements:

- 24/7 system availability
- Minimal downtime
- Cloud-based hosting
- Disaster recovery

Example: Managers should be able to access the CRM system during peak business hours, weekends, or late nights.

Salesforce cloud provides high uptime.

NFR-6: Scalability

The system should support business growth without affecting performance.

Requirements:

- Ability to handle more users
- Support increasing customer data
- Expandable storage
- Maintain system speed

Example: If TheChaiShop&Co expands to multiple branches, the CRM system should support thousands of customers without slowing down.

Salesforce infrastructure automatically scales.

2.5 Data Flow Diagram

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports →

Dashboards.

2.6 Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

3. PROJECT DESIGN PHASE

3.1 Problem–Solution Fit

The CRM system replaces manual records with automated data management. Cloud storage prevents data loss, dashboards improve analysis, and real-time reports eliminate delays. This ensures accurate and timely business insights generation.

3.2 Proposed Solution

Functional Requirements

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.
Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.
Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.

Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

3.3 Solution Architecture

Architecture Layers

1. Presentation Layer – Lightning UI
2. Application Layer – Flows and Logic
3. Data Layer – Custom Objects
4. Analytics Layer – Reports and Dashboards

This layered architecture ensures modularity, scalability, and maintainability.

4. PROJECT PLANNING & SCHEDULING

4.1 Project Planning

- The project followed an Agile-based development approach with defined

milestones and sprints.

- A Salesforce Developer account was created to set up the development environment.
- Custom objects were designed to store customer, employer, and enterprise data.
- Custom tabs and a Lightning Application were developed for easy system navigation.
- Fields, relationships, and global picklists were configured to ensure data consistency.
- Page layouts and record types were created based on user roles and customer categories.
- Validation rules were implemented to prevent incorrect data entry.
- Email templates and automated flows were developed for customer notifications.
- Reports and dashboards were created for performance monitoring and analysis.
- Regular sprint reviews and testing were conducted to track progress and resolve issues.
- The project was completed within the planned timeline through systematic scheduling.

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Member s
Sprint-1	Developer Setup	USN-1	As an admin, I want to create a Salesforce developer account so that I can configure and deploy the TheChaiShop&Co CRM application.	1	High	Member1

Sprint-1	Data Modeling	USN-2	As an admin, I want to create Customer, Employer, and Enterprise objects so that business data can be stored and managed systematically.	3	High	Member2
Sprint-2	Data Modeling	USN-3	As a user, I want separate tabs for each object so that I can easily navigate and manage CRM records within the application.	3	High	Member3

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-2	Data Modeling	USN-4	As a manager, I want a dedicated Lightning App so that all CRM operations are accessible from a single dashboard.	3	High	Member4
Sprint-2	Data Modeling	USN-5	As an admin, I want to create customer and order fields so that complete sales and billing details can be captured accurately.	5	Medium	Member1
Sprint-2	Data Modeling	USN-6	As a user, I want customized page layouts for different record types so that only relevant information is displayed during data entry	5	High	Member2
Sprint-2	Data Modeling	USN-7	As a manager, I want separate record types for Retail and Enterprise customers so that different business categories can be managed efficiently.	5	Medium	Member3
Sprint-3	Automation	USN-8	As a system, I want to validate customer details and order inputs so that incorrect data entries are prevented.	3	High	Member4
Sprint-3	Automation	USN-9	As a system, I want automated flows to send email notifications so that customers receive timely updates and offers.	5	High	Member1
Sprint-4	Automation	USN-10	As a system, I want to automatically calculate billing amounts so that invoices are generated without manual effort.	5	High	Member2
Sprint-5	Reports	USN-11	As a manager, I want sales and customer reports so that I can monitor business performance and make informed decisions.	4	High	Member3
Sprint-6	Dashboards	USN-12	As a manager, I want visual dashboards so that I can quickly analyze sales, customers, and enterprise performance.	4	Medium	Member4

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	29 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022		
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022		
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022		

5. Project Development Phase:

Project Flow

Milestone 1 : Creation of developer account

Milestone 2 : Object Creation

Milestone 3 : Tabs

Milestone 4 : The Lightning App

Milestone 5 : Global Picklist

Milestone 6 : Fields and Relationships Milestone 7 :

Creation of Page Layout Milestone 8 : Creation of

Record Types Milestone 9 : Validation rules

Milestone 10 : Email Templates Milestone

11 : Flows

Milestone 12 : Reports and Dashboards Milestone

13 : Conclusion

What you'll learn

1. Real Time Salesforce Project

2. Standard and Custom objects
3. Picklist Value sets
4. Types of Fields & their relationships.
5. Page Layouts
6. Record Types
7. Validation Rules
8. Email Templates
9. Flows
10. Reports and Dashboards.

Implementation

Milestone 1 - Salesforce developer account creation : Activity 1: Creating Developer

Account:

Creating a developer org in salesforce.

1. Go to <https://developer.salesforce.com/signup>
2. On the sign up form, enter the following details :

Build for the Agentic Enterprise. Sign up for your Developer Edition.

The entire Salesforce platform - exposed as APIs, MCP tools, and CLI commands. Build apps, ship agents, and let coding agents do the heavy lifting with Salesforce Headless 360.

- ✓ Build AI agents with Agentforce, grounded in your data with Data 360
- ✓ Connect Claude Code, Cursor, or Codex to your org with hosted MCP
- ✓ Build in the browser with the Agentforce Vibes IDE - no setup required
- ✓ Drag-and-drop when you want it, Apex when you need it
- ✓ 60+ MCP tools and 30+ coding skills, ready out of the box

Sign up for your Developer Edition

A free Salesforce Platform environment with Agentforce and Data 360

First name	Last name

☐ I agree to the [Main Services Agreement - Developer Services](#), [Salesforce Program Agreement](#), and [API Terms of Service](#)

Your free trial may be provisioned on or migrated to Hyperforce, Salesforce's public cloud Infrastructure.

I acknowledge, as described in the Developer Documentation: (1) the Developer Edition includes autonomous and other generative AI features; and (2) Salesforce may limit use of those features and the org, and may terminate any org that has been inactive for 45 days.

We value your privacy. To learn more, visit our [Privacy Statement](#).

[Sign me up](#)

1) First name & Last name

2) Email

3) Role : Developer

4) Company : College or Company Name

5) County : India

6) Postal Code : pin code

7) Username : should be a combination of your name and company This need not be an actual email id, you can give anything in that format :

username@organization.com

Click on sign me up after filling these.

Activity 2: Account Activation :

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

2. Click on Verify Account.
3. Give a password and answer a security question and click on change password.

Change Your Password

Enter a new password for lead@sb.oom.
Make sure to include at least:

- ✓ 8 characters
- ✓ 1 letter
- ✓ 1 number

* New Password

..... Good

* Confirm New Password

Milestone 2 - Objects

1. In your Salesforce org, click gear icon on the top left and select Setup to open

Setup.

2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.

3. On the Object Manager page, click Create | Custom Object.

Activity 1 : Employer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Employer Account
- **Plural Label** : Employer Accounts
- Enter Record Name Label and Format

Record Name : Employer Account Name Data

Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

The screenshot displays the Salesforce Setup interface. At the top, there's a 'Developer Edition' badge and a search bar. The navigation menu on the left includes 'Setup', 'Home', and 'Object Manager' (which is selected). Below the navigation menu, the breadcrumb trail shows 'SETUP > OBJECT MANAGER' and the title 'Employer Account'. The main content area is divided into two sections: 'Details' on the left and 'Optional Features' on the right. The 'Details' section includes fields for 'Description', 'API Name' (Employer_Account_c), 'Custom' (checked), 'Singular Label' (Employer Account), and 'Plural Label' (Employer Accounts). The 'Optional Features' section includes checkboxes for 'Enable Reports', 'Track Activities', 'Track Field History', 'Deployment Status' (Deployed), and 'Help Settings' (Standard salesforce.com Help Window).

Details	Optional Features
Description	
API Name Employer_Account_c	Enable Reports
Custom ✓	Track Activities
Singular Label Employer Account	Track Field History
Plural Label Employer Accounts	Deployment Status Deployed
	Help Settings Standard salesforce.com Help Window

Activity 2 : Customer Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Customer Account
- **Plural Label** : Customer Accounts
- Enter Record Name Label and Format

Record Name : Customer Account Name Data

Type : Text

- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Activity 3 : Enterprise Account Object

1. From the setup page → Click on Object Manager → Click on Create → Click on Custom Object.

- **Label** : Enterprise Account
- **Plural Label** : Enterprise Accounts

- Enter Record Name Label and Format
Record Name : Enterprise Account Name Data
Type : Text
- **In Optional features** : check the boxes for Allow Reports | Allow Activities | Track Field History.
- **Search Status** : check the box for Allow Search.
- Save

Milestone 3 - Tabs

Activity 1 : Custom tabs creation

1. Go to setup page → type Tabs in Quick Find bar → click on tabs → New (under custom object tab)

2. Select Object(Employer Accounts) → Select the tab style → Next (Add to profiles page) keep it as default → Next (Add to Custom App) uncheck the include tab .
3. Make sure that the Append tab to users' existing personal customizations is checked.
4. Click save.
5. Repeat the same steps for Customer Accounts and Enterprise Accounts.

Milestone 4 - The Lightning App

Activity 1 : Create a lightning app

1. Go to setup page → search “app manager” in quick find → select “app manager”
→ click on New lightning App.

2. Fill the app name in app details and branding as follow App

Name : TheChaiShop&Co

Developer Name : Auto Populates

Add image optional (if you want to give any image you can otherwise not mandatory) -

Add Primary color Hex or leave it to default.

Then click Next.

The screenshot shows the 'New Lightning App' setup page. The page is titled 'New Lightning App' and 'App Details & Branding'. Below the title, there is a instruction: 'Give your Lightning app a name and description. Upload an image and choose the highlight color for its navigation bar.' The page is divided into two main sections: 'App Details' and 'App Branding'. In the 'App Details' section, there are three fields: 'App Name' (filled with 'TheChaiShop&Co'), 'Developer Name' (filled with 'the_chai'), and 'Description' (empty). In the 'App Branding' section, there is an 'Image' field with an 'Upload' button, a 'Primary Color Hex' field with a value of '#0070D2', and an 'Org Theme Options' section with a checkbox labeled 'Use the app's image and color instead of the org's custom theme'. Below these sections is an 'App Launcher Preview' showing a blue square with the letters 'Th' and the text 'TheChaiShop&Co'. At the bottom right of the page is a 'Next' button.

3. In App options

6. To Add User Profiles : System Administrator

7. Click Save & Finish.

Milestone 5 : Global Picklist

Activity 1 : Create Global Picklist

1. In Quick find box search for : Picklist value sets and click New.

The screenshot shows the Salesforce Developer Edition interface. At the top, there's a navigation bar with a hamburger menu, a 'Developer Edition' badge, and a user profile icon. Below this is a search bar labeled 'Search Setup'. The main navigation area includes 'Setup', 'Home', and 'Object Manager'. The left sidebar shows a search for 'picklist value sets' and a list of results under 'Objects and Fields', with 'Picklist Value Sets' highlighted. The main content area is titled 'Picklist Value Sets' and includes a description: 'Global picklist value sets let you share the values across objects. Base custom picklist fields on a global value set to inherit its values. The value set is restricted so users can't add unapproved values through the API.' Below the description, there's a 'View:' dropdown set to 'All' and a 'Create New View' link. A alphabetical navigation bar (A-Z, Other, All) is visible. At the bottom, there's a 'Global Value Sets' section with a 'New' button.

- **Label** : Gender
Name : Auto Populates
Values : Male
 Female
 Others
 Click **Save & New**.

2. Create three more Global picklists following the same steps.

- **Label :** Items

Milestone 6 : Fields & Relationships

Activity 1 : Create Custom fields for Employer Account

1. In your Salesforce org, click gear icon on the top left and select Setup to open Setup.
2. Click the Object Manager tab. If you don't see it, enter Object Manager in the Quick Find box.
3. From the object manager page, In the Quick Find box, Search for the custom object you just created : **Employer Account**
4. From the sidebar, click Fields & Relationships. Notice that there are already some fields there. Those are the standard fields.
5. Click New to create a custom field. Tip: Before creating a new field, do a quick search to make sure a similar one doesn't already exist.

The screenshot shows the Salesforce Setup interface. At the top, there's a 'Developer Edition' header. Below it, a search bar labeled 'Search Setup' is visible. The main navigation bar includes 'Setup', 'Home', and 'Object Manager'. The 'Object Manager' page is active, displaying 'SETUP > OBJECT MANAGER' and 'Employer Account'. On the left sidebar, 'Fields & Relationships' is selected. The main content area shows a 'Quick Find' search bar and buttons for 'New', 'Deleted Fields', and 'Field Dependencies'. A table lists existing fields:

FIELD LABEL	FIELD NAME	DATA TYPE	CONTROLLI
Aadhar Number	Aadhar_Number__c	Text(12)	Data Type
Created By	CreatedById	Lookup(User)	

6. Next, choose a data type as Text. Choosing a data type helps you format the field input.

7. Click on next.

The screenshot shows the 'New Custom Field' wizard in Salesforce. The title is 'Employer Account New Custom Field'. The current step is 'Step 2. Enter the details' out of 4. There are 'Previous', 'Next', and 'Cancel' buttons. The form contains the following fields:

- Field Label:** First Name
- Length:** 25 (with a note: 'Please enter the maximum length for a text field below.')
- Field Name:** First_Name
- Description:** (empty field)

8. Data Type : Text

10. Data Type : **Picklist**

Field Label : Payment Mode

Values : Use **Global Picklist** value set and select

Payment Mode from the dropdown menu. Field

Name : Auto Populates.

Required : Check the box

Click on Next → Next → Save.

Milestone 7 : Page Layouts

For the personalized field view in Customer Accounts, let's create two page layouts Online orders and Walk-In orders.

Activity 1: Online Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.

3. Page Layout Name : Online Orders and click Save.

4. Drag and Arrange all the required fields as shown below.

5. Click **Save**.

Activity 2: Walk-In Orders page layout

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Page Layouts → click New.
3. Page Layout Name : Walk-In orders and click save.
4. Drag and Arrange all the required fields as shown below.
5. Click **Save**.

Milestone 8 - Record Types

To Differentiate the records and data stored in Customer Accounts, let's create two different Record Types.

Online orders and Walk-In orders.

Activity 1: Online Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.

3. Enter Details :

Existing Record Type : Master Record

Type Label : Online Order

Record Type Name : Auto Populates

Active : Tick the checkbox

Click Next

The screenshot shows the 'New Record Type' setup page for the 'Customer Account' object. The page is titled 'Customer Account' and is part of the 'Object Manager' setup. The left sidebar shows the navigation menu with 'Record Types' selected. The main content area is titled 'New Record Type Customer Account' and includes a 'Help for this Page' link. The 'Step 1. Enter the details' section contains the following fields: 'Existing Record Type' (dropdown menu set to '--Master--'), 'Record Type Label' (text input with 'online order'), 'Record Type Name' (text input with 'online_order'), and 'Description' (text input). The 'Active' checkbox is checked. A 'Required Information' indicator is present next to the 'Record Type' label.

4. In Assign Page Layouts

The screenshot shows the 'Assign Page Layouts' section. It contains the instruction: 'Select the page layout that users with this profile see for records with this record type. After saving, choose the picklist values that are available with this record type.' Below this, there are two radio buttons: 'Apply one layout to all profiles' (selected) and 'Apply a different layout for each profile'. To the right of the radio buttons is a dropdown menu showing 'Online Orders'.

Select

Apply one layout to all profiles : select **Online orders** from the drop down menu.

5. Click **Save and New**.

Activity 2: Walk-In Orders Record Type

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the Record Types → click New.
3. Enter Details :

Existing Record Type : Master Record

Type Label : Walk-In Order Record

Type Name : Auto Populates Active :

Tick the checkbox

Click Next

4. In Assign Page Layouts

- Select Apply one layout to all profiles : select **Walk-In orders** from the drop down menu.

5. Click **Save**.

The screenshot shows the Salesforce 'Customer Account' setup page. The breadcrumb trail is 'SETUP > OBJECT MANAGER'. The page title is 'Customer Account'. On the left is a navigation menu with options: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, and Compact Layouts. The main content area is titled 'Record Types' and shows '2 Items, Sorted by Record Type La...'. There is a 'Quick Find' search bar and two buttons: 'New' and 'Page Layout Assignment'. A table lists the record types:

RECORD TYPE LAB...	DESCRIPTION	ACTIVE	MODIFIED BY
Online Order		✓	sumithra R, 9/23/2026, 10:49 AM
Walk-In Order		✓	sumithra R, 9/23/2026, 10:50 AM

Milestone 9 - Validation Rules Activity 1: On Employer Account

1. Go to the setup page → click on object manager → From drop down click edit for **Employer Account** object.
2. Click on the validation rule → click New.

SETUP > OBJECT MANAGER

Employer Account

4. Click Save.

The screenshot shows the Salesforce 'Customer Account Validation Rule' configuration page. The breadcrumb trail is 'SETUP > OBJECT MANAGER'. The page title is 'Customer Account'. A left sidebar contains navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, and Search Layouts. The main content area is titled 'Customer Account Validation Rule' with a 'Back to Customer Account' link and a 'Help for this Page' icon. Below the title is a 'Validation Rule Detail' section with 'Edit' and 'Clone' buttons. The rule is named 'Phone_Number' and is 'Active' (indicated by a checkmark). The 'Error Condition Formula' is: `AND( NOT(ISBLANK( Phone_Number__c )), NOT(REGEX( Phone_Number__c , "[1-9][10]$")), NOT(REGEX( Phone_Number__c , "^\d+$")) )`. The 'Error Message' is: 'The phone number field must not be blank. The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)'. The 'Error Location' is 'Top of Page'. The 'Description' field is empty. At the bottom, it shows 'Created By' as 'sumithra R, 9/23/2026, 11:03 AM' and 'Modified By' as 'sumithra R, 9/23/2026, 11:03 AM', with 'Edit' and 'Clone' buttons.

Activity 3: On Enterprise Account

1. Go to the setup page → click on object manager → From drop down click edit for **Customer Account** object.
2. Click on the validation rule → click New.
3. **Enter Rule Name : Phone Number**

Error Condition Formula :

```
AND(  
NOT(ISBLANK( Phone_Number__c )), NOT(REGEX(  
Phone_Number__c , "[1-9]{10}$")), NOT(REGEX(  
Phone_Number__c , "^\\d+$"))  
)
```

Error Message :

The phone number field must not be blank.

The phone number must consist of exactly 10 digits. The phone number must contain only numeric digits (no spaces, dashes, parentheses, etc.)

4. Click Save.

It has a title 'Create folder' and two input fields: '* Folder Label' with the text 'Customer Vs Enterprise Sales' and '* Folder Unique Name' which is empty. At the bottom, there are 'Cancel' and 'Save' buttons. The form is styled with a light gray background and blue text.

5. Click Widget
6. Select Chart or Table.
7. Select Customer Account Sales Report

8. Display As : Select the one which you feel comfortable with.
9. Click **Add**.
10. Repeat the same steps for the Enterprise Account Sales Report.
11. Click **Save**.

MILESTONE 12 – CONCLUSION

In conclusion, the development of **TheChaiShop&Co CRM Application** marks a significant stride in enhancing the store's operational efficiency and customer relationship management capabilities.

Seamlessly integrating employer details, customer information (both online and offline), and enterprise data, this application streamlines business processes and enables informed decision-making.

The automation of sales calculations, including order quantity and total bill amount, reduces errors and empowers employees to focus on delivering exceptional service. Moreover, automated email notifications for customers' birthdays foster personalized communication and enhance customer engagement.

1. FUNCTIONAL & PERFORMANCE TESTING

During the testing phase, screenshots were captured from the **Salesforce Lightning interface** to verify correct system behavior. These include:

- Record creation for **Employer, Customer, and Enterprise** objects.
- Validation rule testing for **Aadhar, PAN, and phone numbers**.
- Verification of **record types and page layouts**.
- Formula field validation for **order quantity and billing**.
- Flow execution for **birthday email alerts**.
- **Report and dashboard** generation.

Performance testing ensured **fast response time and system stability during concurrent usage**.

2. ADVANTAGES & DISADVANTAGES

Advantages

- Centralized data management
- Reduced manual work
- Automated calculations
- Improved customer engagement
- Real-time analytics

Disadvantages

- Requires Salesforce license
- Internet dependency
- Limited offline access

3. CONCLUSION

The **CRM Application for TheChaiShop&Co** successfully improves business operations by integrating customer data, automating billing, and enabling intelligent reporting.

The system reduces errors, saves time, and enhances customer relationships through automation and analytics.

4. FUTURE SCOPE

The future scope of the CRM application includes:

- Mobile CRM integration
- AI-based sales prediction
- WhatsApp/SMS alerts
- Inventory management
- Multi-branch support
- Advanced customer profiling
